MVCCONF ARCHIVE DOCUMENT

Sponsor overview

A printable summary of the conference program and the companies that supported it.

The program

mvcConf was an online event built around ASP.NET MVC. The 2010 and 2011 editions brought together framework team members, working developers, and community speakers for a focused online program.

The public record includes 27 sessions, 27 published recordings, a speaker roster, a sponsor list, and a downloadable wallpaper pack. Sessions cover the framework, data access, testing, deployment, the view layer, and community practice.

Audience

The program was built for developers, architects, and technical leads who work with ASP.NET MVC and the surrounding .NET toolchain. The talks are aimed at developers who already work with web applications and focus on decisions that affect real projects.

Sponsor tiers

PLATFORM PARTNERS	Microsoft, Umbraco
PROGRAM SPONSORS	Telerik, DevExpress, NimblePros, Infragistics, TechSmith
COMMUNITY PARTNER	The Code Project
LEARNING PARTNER	Pluralsight

About this document

This overview was prepared for the redesigned archive. It replaces the original sponsor letter with new copy and does not reproduce the original document. It is a reference summary, not a live call for sponsors.

The archive is available at https://mvcconf.com/.
